Jenkins Build:

The console output is attached to this folder as a separate file.

This screenshot shows the Jenkins configuration page for a project named 'Tourism_Information'. The 'Configure' tab is selected, and the 'Triggers' sub-tab is active. The 'Poll SCM' trigger is checked, with a schedule of 'H/2 * * * *'. Below the schedule, a message indicates the last run was on Friday, 3 July 2026, at 23:28:00 India Standard Time, and the next run is on Friday, 3 July 2026, at 23:30:00 India Standard Time. Other triggers like 'Build after other projects are built', 'Build periodically', and 'GitHub hook trigger for GITScm polling' are unchecked. There are also checkboxes for 'Ignore post-commit hooks' and 'Trigger builds remotely (e.g., from scripts)'. The 'Pipeline' section is visible at the bottom, with a description: 'Define your Pipeline using Groovy directly or pull it from source control.' Buttons for 'Save' and 'Apply' are at the bottom.

This screenshot shows the Jenkins configuration page for the same project, but with the 'Definition' sub-tab selected. The 'Pipeline script from SCM' option is chosen. The 'SCM' is set to 'Git'. Under 'Repositories', the 'Repository URL' is 'https://github.com/Stranger0071/-23BCI0264-DevOps-Tourism-Information.git'. The 'Credentials' dropdown is set to '- none -'. There is an 'Add' button next to the credentials dropdown. Below the repository details, there is an 'Advanced' dropdown and an 'Add Repository' button. At the bottom, there are 'Save' and 'Apply' buttons.
